TRAINING ANNOUNCEMENT

Free online course: Flood Provisions of the International Residential Code

Free online course: Flood Provisions of the International Residential Code

FEMA Building Science in partnership with the International Code Council is proud to launch the new online course “Flood Provisions of the International Residential Code” in celebration of Building Safety Month. For a limited time, this course will be available free of charge.

Flood Provisions of the International Residential Code (IRC) is a two-part course presenting basic information needed to understand the flood provisions of the IRC. Its goal is to educate floodplain management and building officials, design professionals, and builders about: how the building code provisions satisfy the National Flood Insurance Program (NFIP) requirements for buildings, coordinating building codes and local floodplain management ordinances, and the distinctions between the International Codes and the NFIP floodplain management requirements.

The course can be accessed at the links below:

Part 1: <http://media.iccsafe.org/catalog/Flood-Provisions-IRC-Pt1/presentation.html>

Part 2: <http://media.iccsafe.org/catalog/Flood-Provisions-IRC-Pt2/presentation.html>

FEMA Building Science is celebrating [Building Safety Month Week 3: Manage the Damage – Preparing for Natural Disasters](#)
