

IAEI Granite State Chapter Presents

Understanding Emergency and Standby Electrical Installations

Quality Training for the Electrical Professional

IAEI is a leader in providing quality technical and safety training to the electrical industry. We at The Granite State Chapter strive to live up to this standard. We are certain we have with this presentation. Do you install Emergency or Standby Generator Systems? if so you should make it a point to attend this event. **Mark Hilbert** has designed a program that will take us through an extensive study of the 2017 NEC requirements on the proper design, installation and inspection of emergency and standby systems. Time will be allowed for Q&A at the end of each segment. This is a can't miss training and networking opportunity for Inspectors, Designers and Installers.
